

Study Guide: EOS (End-of-Section) Test

Overview: American People, American Land

Test Format: Multiple Choice

Test Date: Friday, September 30, 2016

- The motto of the United States of America is *E Pluribus Unum*. It is Latin for “Out of Many, One.”
- A census is an official count of all the people in the United States.
- American ideals, or beliefs, include freedom of speech, freedom of religion, and freedom to live and work where we choose.
- Americans also believe in equal rights for all people.
- An ethnic group is a group of people who share the same customs and language.
- The Pledge of Allegiance helps bring together the many different people who live in the United States. It says that Americans believe in the ideals of freedom and fairness for all people.
- A member of a country is called a citizen.
- Citizens play the most important part in the U.S. government.
- Citizens have several basic rights. Their rights include freedom of speech, freedom of religion, and the right to a fair trial.
- All citizens who are at least 18 years old have the right to vote.

Study Guide: EOS (End-of-Section) Test

- The U.S. economy is based on a system called free enterprise that lets Americans start their own businesses and own private property.
- An export is a good that one country sells to another country
- An import is a good that one country buys from another country.
- Prices for goods are based on supply and demand. If demand is high and supply is low, the price is usually high. If the supply is high and the demand is low, the price is usually low.
- Benefits of free enterprise are that consumers can choose between many different products and decide how to spend their money.
- Entrepreneurs are business owners and are helped through free enterprise to start a business and make a profit.
- The five regions of the U.S. are the Northeast, Southeast, Southwest, Midwest, and West.
- Different areas of the country have different climates. Climates in the U.S. get cooler as you move north and drier as you move west.
- Many regions are interdependent, meaning they depend on one another.
- Fossil fuels like coal, oil, and natural gas are used for energy.
- Fossil fuels are formed in the earth from remains of plants and animals that lived long ago. They are nonrenewable.

Study Guide: EOS (End-of-Section) Test
